

City of Bayonne, New Jersey Chooses Avrio RMS Group for City-Wide Surveillance System

Easton, Maryland, June 4, 2007- Avrio RMS Group announced today that the City of Bayonne New Jersey, has selected Avrio RMS Group to design and deploy a citywide mesh network and video surveillance solution which will be used for public safety. The solution uses an open and non-proprietary approach to incorporate wireless cameras from around the city. Video will be able to be viewed from anywhere on the city’s network – even from mobile police cruisers should the City choose that option in the future.

“Avrio RMS Group was selected based on their design, price and past performance as well as conversations with their customers who were extremely pleased with Avrio RMS Group’s solutions,” says Deputy Chief Niekrasz. “Bayonne is getting the state-of-the-art when it comes to high-end video surveillance systems. This system is extremely reliable and allows the city to easily relocate cameras as crime needs dictate.” says Mark Jules, President of Business Development for Avrio RMS Group.

“We really like Avrio RMS Group’s design because it allows us to easily add cameras and other new technologies in the future,” says Deputy Chief Niekrasz. The foundation of the system is Avrio RMS Group’s Rapid Deployment (RD) POLECAM, a single “plug-and-play” device that contains a high end camera, a wireless mesh node and all components needed to hang the unit on a pole or building. The system also allows for integration with other systems such as video intelligence, license plate recognition and gun shot detection.

About the Avrio RMS Group

Avrio RMS Group is a national leader in IP-surveillance solutions for the public safety market. The company designs, engineers and deploys turnkey wireless security solutions for municipalities and organizations with wide area surveillance needs. A pioneer in the space, Avrio RMS Group created the nation’s first pole mounted wireless surveillance camera systems known as PODSS® (Portable Over Digital Surveillance Systems) and developed the nation’s most sophisticated wireless IP video network covering over 200 square miles. Avrio RMS Group deployments protect several US cities, the Northern and Southern US Borders and have secured VIP events such as the Presidential Inauguration, Democratic National Convention, Republican National Convention and the Superbowl. With offices in Buffalo Grove, IL and Easton, MD, Avrio RMS Group is privately held and its customers include government and private organizations around the globe. www.avriormsgroup.com
